RESOLUTIONS

8. 2022 - 01 - Resolution to Amend the Character Area Map (Planning Director Bruce Georgia)

Amicalola Propane, Inc. has submitted a Character Area Map Amendment (CAMA) for approval for 283 Red Oak Flats Loop, Dahlonega, GA 30533, parcel 098-015 Resolution to Amend the Character Area Map.

Commissioner Mayfield asked why we need to recategorize the entire area just because it is one parcel. Could we just amend the character area for part of the parcel instead? Mr. Reiter said we are not obligated to do the entire property, but they like to keep Character Areas along property lines to make it easier. The property owner wants to be able to divide up the larger parcel and sell some of the other parcels later. Commissioner Moran asked why the property owner wants this parcel changed to "industrial" if any business could technically go into

any Character Area? Mr. Reiter said part of it is the moratorium, but he also plans for this area to become an industrial park. He believes that according to our regulations, an industrial park must be within an Industrial Character Area.

Commissioner Stringer said he is in favor of the proposed conditions but he wants to discuss the 8 foot opaque fence requirement to screen outdoor storage. He said trees or a similar vegetative buffer would seem better to him than a tall fence. Mr. Reiter said the screening is not to shield industrial uses from seeing each other, but to prevent neighboring property owners from having to see the outdoor storage areas. Any place along the perimeter or the right of way next to a non-industrial parcel would have to have the visual screening. He said they could change the wording from opaque fence to a vegetative screen. Commissioner Greene said he would hope the fencing or screening would only be required around the outdoor storage areas, and not the entire parcel. Mr. Reiter said that was the intent.

Commissioner Moran asked if it would be possible to mail all neighboring property owners a notification when something like this is occurring. He said not everyone looks at the paper or notices the yellow sign on the property about upcoming public hearings or similar things. Mr. Reiter said that is doable; it would be simple to determine the nearby neighbors who would be affected using GIS, and they could use the address on file with the Assessor's office to mail a letter.

Commissioner Stringer asked why do we have it stating that no chicken houses would be allowed when there used to be some there? Mr. Reiter explained they were trying to avoid uses that would be a nuisance due to odor. Commissioner Stringer mentioned that the property owner had considered putting a home on the property as well, and stated he should be able to if he owns 65 acres, regardless of the Character Area. Chairman Dockery suggested that in such a scenario, the plat should include a note mentioning the industrial area when it is submitted for approval. Commissioner Greene made some comments about the definition of vegetative screening, and asked what would be a sufficient vegetative buffer.

9. 2022 - 02 - Reappoint Members to the Airport Authority - Jackie Lee & Dean Lemoine both terms exp 02/19/2026

Reappoint Members to the Airport Authority - Jackie Lee to Seat A & Dean Lemoine to Seat C both terms expiring 02/19/2026

Reappoint Members Public Building Authority - Chris Dockery to Seat 1 & Ruth Bohac to Seat 2 both with terms expiring 02/21/25.

11. 2022 - 04 - January Surplus Property (Finance Director Abby Branan)

January Surplus Property. Consideration of list of County inventory items to be declared surplus.

Chairman Dockery asked the Finance Director, Abby Branan, about the new vehicle tracking policy and how we were ensuring the proper replacement of old vehicles. Human Resources Director Alicia Davis explained that in situations where a vehicle is totaled, sometimes it can be more complicated due to insurance reasons, and the process of getting rid of it will take longer. The Chairman said he wants the Commissioners to be informed of all incoming and outgoing vehicles, whether they are totaled or just too old. He also would like to know which specific new vehicles are replacing the old vehicles, and the justification for the types of vehicles purchased. He said it is one thing to know the amount budgeted for vehicle replacement, but it is important to understand the types of vehicles being purchased as well.

Commissioner Greene asked questions about how long it normally takes for a vehicle to be replaced once it is surplus. Mr. Reiter explained it sometimes takes a long time to obtain a replacement vehicle once it is ordered. Ms. Branan gave an example of when the Sheriff's Office uses SPLOST funds to obtain new vehicles, they don't surplus the old vehicles until the new ones are ready. The Chairman said they just want to ensure that the fleet size is remaining the same.

12. 2022 - 05 - Resolution to Adopt the Road Within Camp Creek Overlook Subdivision (Public Works Director Larry Reiter)

Resolution to Adopt the Road Within Camp Creek Overlook Subdivision. Greg Hayes has requested that the road in Camp Dr. be accepted into the County Maintenance System

Chairman Dockery had some concerns over the liability of the County adopting a one lane, one way road. Mr. Reiter explained that one way, one lane roads are allowed in subdivisions in certain scenarios involving the right-of-way, and this one meets the criteria. The Chairman said this should be an exception, not the rule, since the County could end up inheriting an issue which could become a burden to taxpayers. He said this might be a good time to re-examine the subdivision regulations.

Commissioner Stringer said many of the road complaints he receives are about small, one lane roads like this. We need to decide what we want and don't want, and then change the regulations to suit it. Mr. Reiter was asked if this street is curbed and guttered, and he responded negatively, though he pointed out it would be eligible for LMIG funding. Commissioner Stringer said a cheaper cost for the developer is not an adequate reason for making a one-way road, and the Chairman agreed with him. Chairman Dockery said perhaps we can re-evaluate the subdivision regulations soon.

CONTRACTS/AGREEMENTS

13. 2022-001 - Health Department Request to Install Generator Back-Up System (Special Projects Director Ashley Peck)

Health Department Request to Install Generator Back-Up System. The Lumpkin County Health Department is requesting permission to install a back-up generator system.

14. 2022-002 - Mauldin & Jenkins - 2021 Audit Engagement Letter (Finance Director Abby Branan)

Mauldin & Jenkins – 2021 Audit Engagement Letter. 2021 Audit engagement letter that identifies the applicable financial reporting framework, single audit standards, and the expected form and content of auditor's report.

Chairman Dockery asked Ms. Branan to find out if they would have a different auditing team than the one from last year.

OTHER ITEMS

15. Election of Vice Chairman

Election of Vice Chairman

16. Alcoholic Beverage License - Trattoria Restaurant (County Clerk Melissa Witcher)

Alcoholic Beverage License - Trattoria Restaurant. This is for the issuance of an alcoholic beverage license for Beer/Wine & Distilled Spirits Consumption sales located at 946 Via Montaluce, Dahlonega, GA 30533.

17. 2020 SPLOST 2022 Work Plan (Finance Director Abby Branan)

2020 SPLOST 2022 Work Plan. Request to approve work plan on 2020 SPLOST.

18. 2019 TSPLOST 2022 Work Plan (Finance Director Abby Branan)

2019 TSPLOST 2022 Work Plan. Request to approve work plan on the 2019 TSPLOST.

Commissioner Stringer asked about the progress on the Oak Grove Roundabout, and there was discussion over the retaining wall's appearance. Chairman Dockery said the wall serves its purpose, but it isn't aesthetically pleasing. We may have responsibility for part of the cost of improving the wall. He wanted suggestions on a cap for the cost, but he said he did not want to hold up the entire project. Mr. Reiter said the company will surely ask for a cost share on the wall improvements, but he doesn't know the value yet. Commissioner Moran said he doesn't want to put too much of a burden on the taxpayers.

19. Animal Shelter Funding Update (Finance Director Abby Branan)

Animal Shelter Funding Update

COUNTY MANAGER

Larry Reiter gave an update on the road clearing progress.

COUNTY ATTORNEY

COMMISSIONERS

The Commissioners thanked the Public Works road crew for their hard work on clearing the debris from the recent storm.

RESOLUTIONS

10. 2022 - 01 - Resolution to Amend the Character Area Map (Planning Director Bruce Georgia)

Amicalola Propane, Inc. has submitted a Character Area Map Amendment (CAMA) for approval for 283 Red Oak Flats Loop, Dahlonega, GA 30533, parcel 098-015 Resolution to Amend the Character Area Map.

Commissioner Moran asked if the adjacent property owners were aware of the Character Area Map amendment request, and Planning Director Bruce Georgia replied that signs have been posted at the property line and street frontage, and the CAM amendment process has been published in the paper. Commissioner Moran thinks in the future, we should send out letters to adjacent property owners for important changes like this.

2019 TSPLOST 2022 Work Plan. Request to approve work plan on the 2019 TSPLOST.

22. New Animal Shelter Update (Special Projects Director Ashley Peck, Finance Director Abby Branan)

New Animal Shelter Update Authorize staff to obtain the services of an owner's representative

Authorize staff to move forward with obtaining an architect Authorize staff to move forward with using the CM at Risk build model

Finance Director Abby Branan said they reviewed the 2014 SPLOST and found that revenues had exceeded expenditures. An animal shelter was included in the referendum for the SPLOST, so the money can be used for that purpose. Special Projects Director Ashley Peck said there are three actions the BOC will need to approve so staff can begin the process. We need to obtain an Owner's Representative, an architect, and a Construction Manager at Risk. An animal shelter will be more involved than a standard build, as there are federal and state regulations on how a shelter is constructed. The County has previously used the construction manager at risk model with great success, as it ensures the manager has to follow the Guaranteed Maximum Price (GMP).

Chairman Dockery suggested using Greg Trammell as the Owner's Representative again. The Commissioners were in agreement to allow staff to proceed with the three actions in question.

COUNTY MANAGER

COUNTY ATTORNEY

County Attorney Joy Edelberg was not present.

COMMISSIONERS

Commissioner Stringer thanked staff for working diligently through the winter storm, and Commissioner Moran said the County's Facebook page has been a great tool to reach out to citizens.

PUBLIC COMMENT (Agenda Specific)

Will Howell, 86 Howells Hollow, came to represent the Riverwalk Subdivision which he developed. Mr. Howell said he and his neighbors heard that the County is considering putting the new animal shelter out at Blackburn Park, which is situated near their neighborhood. They are concerned about potential excessive noise and odor.

Kevin Copp, 805 Blackburn Road, said the proposed shelter location is close to his driveway. He is concerned about well runoff, traffic, and noise. Mr. Copp said he moved from Cumming to be in the country, and he

doesn't want to lose his privacy. He asked if the citizens will have any potential say. Chairman Dockery explained we are still in the planning stages, and this is just a potential site. Nothing can be done without approval from the Department of Health, so there should not be any sanitation or well issues.

Another resident of Riverwalk Subdivision, Adelia Formica, said there are a lot of us that will be impacted by this shelter. Noise will be the number one issue, and it will hurt property values, she claimed. She said she is not opposed to a new animal shelter located in Blackburn Park, but she does not like the current proposed location.

ADJOURNMENT

The meeting was adjourned at 6:10 PM.

Lumpkin County Land Use Revisions Framework

Lumpkin County Land Use Revisions Framework (Planning Director Bruce Georgia)

Lumpkin County Land Use Revisions Framework

Chairman Dockery said the intent is not to replace the Land Use Code, it is to refine it and clarify ambiguities. He said there will be opportunity for public comment after Bruce Georgia's presentation. Mr. Georgia stated he is seeking direction from the Board of Commissioners to ensure staff is headed in the right direction with these revisions. His presentation will lay out how the revisions will be crafted. Staff intends to remove the "every lawful land use" phrase, and take out ambiguous language such as "suggested" or "encouraged/discouraged." They will quantify terms such as noise, odor, light, dust, etc, as well as revising some administrative procedures like variances, appeals, and the SLUA process. Mr. Georgia explained we will still have performance zoning, also known as the Land Use Code.

Mr. Georgia then outlined the eight step plan for revising the Code: 1) Maintain current Character Area Map and revise Character Area definitions. 2) Creation of a road classification plan. 3) Establishment of development categories. 4) Schedule of permitted uses. 5) Chart of permitted access by road classification. 6) Chart of compatibility performance standards. 7) Develop conditional use approval for certain activities, such as wedding venues, event venues, ATV parks, Outdoor ranges, short-term rentals, RV Parks, and outdoor concert venues. 8) Revise current administrative procedures.

Mr. Georgia went into detail about each category. He stated the road classification will be the backbone. The road classification plan will classify all roads as either arterial, connector, or local. The first step for anyone looking to build will be for them to know their road classification; this will cover residential and commercial. The chart of road classifications will be important, as an activity which is prohibited from a certain road classification will not be able to locate where it is only reachable through a road with such a restricted classification. Staff will also develop an extensive list of definitions. Mr. Georgia ended his presentation by going over the revision and implementation timeline.

Discussion

Commissioner Mayfield thanked Mr. Georgia and his staff for the work they had put in to this revision framework. He asked if roads like Auraria would be arterial. Mr. Georgia responded it all depends on how we want to classify them, so we need to ensure we classify them carefully. He mentioned Camp Wahsega Road as an example. It is a paved, well-maintained, two lane road, but it doesn't take you in or out of the County. It leads to the Ranger Camp and National Forest access.

Commissioner Moran reiterated that he wants to get rid of the concept that "any lawful land use can go anywhere" as long as it meets certain setbacks. He said he is unsure that addressing different uses with buffers and setbacks is going to work this time. Mr. Georgia said this will be different because we are adding road classifications and development requirement charts. This is not a complete revision, but it is an enhancement.

Chairman Dockery said this is a good framework. When it comes to appeals, there must be a clearly defined reason and process for an appeal. You can't appeal just because you don't like a decision. There has to be some merit other than "I don't want that next to me," the Chairman said. When someone gets ready to build a house somewhere, there needs to be some kind of recorded acknowledgement of what the surrounding properties are defined as. Additionally, we need to clarify at what point is someone considered to have a vested interest/application for a property? Chairman Dockery said he has looked at other jurisdictions and in some cases, the landowner has to sign an affidavit to let that person act as their agent. At that point they become vested in their inquiry. The Chairman said if the actual use of a development begins to differ from the approved use, we should be able to go back and regulate that. He also said it will be critical to make sure information is posted early enough for citizens to look over. It is more important to get it done right than done quickly.

Mr. Georgia said what's driving this tight timeline is the 180-day development moratorium. However, the moratorium could be extended as there hasn't been a lot of interest. He also pointed out the charts and posters along the wall and welcomed input from the Commissioners and public.

Public Comment

Katherine James, 37 Blueberry Hill, read aloud a prepared statement. She said it would add additional consistency with the descriptions in the Comprehensive Plan and protection for residents if more than just buffers, setbacks, and a landscape strip are required. If something is incompatible with the land use for that character area, then the recommendation would be to take excerpts from the work the Georgian Mountain Regional Commission has already done with applying clarity and consistency to that area. She also said development requirements should have to be compatible with the area and established land use, or else we will get the same problems we are facing now. Collateral damage is being inflicted on homeowners because of incompatible uses being allowed with setbacks and buffers. She also urged the Commissioners to be careful with the road classification system; just because a road is paved and is wide enough, should anything be allowed on it? Ms. James said it will be important to quantify the standards without any ambiguity. Residential should be with residential, and industrial with industrial. She said the framework needs to be specific enough to have real meaning.

Steve Sylvester, 215 Stancil Dyer Road, came with a prepared statement. He said he has read through the revisions framework and said it is lacking clear, concrete, measurable levels of acceptable impact. He also hopes that other impacts like light pollution, water issues, traffic, volume, hours of operation, foot print, and green space requirements are going to be included. He said it is essential that proposed impact standards are measurable, legally binding, and not open to interpretation. Mr. Sylvester said consequences for violations will be important, otherwise violations may just become part of the cost of running a business. He urged the BOC to follow the Georgia Mountains Regional Commission comprehensive plan for our community's future. He said the top three priorities regarding growth in Lumpkin County should be saving natural areas, preserving the rural character, and minimizing impacts.

Perry Abernathy, resident of 355 Cain Bridge Heights, said he lives near the 400 North Landfill and it makes it difficult for him to sleep at night. Hours of operation could make a big difference to the people living around the dump, he claimed. Mr. Abernathy also expressed his concerns that these new restrictions will affect current property owners. He has plans for his property, but due to his disability, he has not been able to do things as quickly as he would like. He said the BOC should not restrict landowners who already have property with these new regulations. Mr. Abernathy said there will be no point in anyone trying to build anything with all of these setbacks and requirements. He has owned his current property since 1986.

Adelia Formica, 181 Riverwalk Drive, asked if these regulations will apply to County-owned properties or buildings. She asked how the animal shelter could be relocated from an industrial area to a rural area. She also knows the County has discussed some other long-term plans for Blackburn Park.

Byron Baudo of 363 Riverwalk Drive also expressed concern over the proposed location of a new animal shelter. He claimed there are numerous technologies to fix and update the existing shelter. He said all newcomers to Lumpkin County should have to microchip their animals, since less than 17% of lost pets are reunited with their owners. Mr. Baudo said people like to dump their animals in remote areas and near animal shelters. A loose, dumped dog could hurt a child at Blackburn Elementary School. He said he would like for the BOC to perform an impact study on an animal shelter in Blackburn Park, and to include both positive and negative aspects.

Robin Hall of Porter Springs Road said it will be pointless to have any kind of Land Use regulations unless they are properly enforced. He said variances are the root cause of so many of the County's problems, and it seems that every variance gets considered. Variances should not be granted unless there is an exceptional need. For development applications, the property owner should be identified on the application. Adequate notice should be given to all neighbors. Mr. Hall said there should be an online database of all building permits and business permits, including variances, that can be seen by all citizens. He does not think this would be an invasion of privacy because everything is on Q-public anyway.

Chairman Dockery thanked everyone for their feedback and said anyone can contact the Commissioners, the County Manager, or the Planning Director with comments.

Adjournment

The meeting was adjourned at 7:19 PM.

RE: Comprehensive Plan Update Submittal

Dear Planning Director,

Our County has completed an amendment to its comprehensive plan in accordance with the *Minimum Standards and Procedures for Local Comprehensive Planning* and is hereby submitting it with this letter for review by the Georgia Mountains Regional Commission and the Department of Community Affairs.

I certify that during the planning process we held the required public hearings and strived to involve key stakeholders in development of the plan in a manner appropriate to our community's dynamics and resources. Evidence of this has been included in our plan.

I also certify that appropriate staff and decision-makers have reviewed both the Regional Water Plan covering our area and the Rules for Environmental Planning Criteria (O.C.G.A. 12-2-8) and taken those into consideration in developing our plan.

If you have any questions concerning our submittal, please contact Bruce Georgia, at 706-864-6894.

Sincerely,

Chris Dockery
Chairman, Lumpkin County
Board of Commissioners

CHAPTER 1

INTRODUCTION

PURPOSE & SCOPE

The purpose of the *Lumpkin County Comprehensive Plan* is to lay out a road map for the community's future, developed through a very public process involving local leaders and stakeholders. The *Comprehensive Plan* includes a vision for the community's future, identification of key needs and opportunities to address during the planning period, and an implementation program for achieving the vision and addressing the issues. The *Comprehensive Plan* is intended to generate local pride and enthusiasm about the future of the community, thereby making citizens wish to ensure that the plan is implemented.

This document addresses the local planning requirements and community development of Lumpkin County, Georgia. Some consideration has been given to the City of Dahlonega and to those areas and political entities adjacent to the County that influence local conditions, but all the cited issues, objectives and opportunities discussed herein are solely focused on Lumpkin County.

REQUIRED COMPONENTS

This comprehensive plan serves to meet the requirements and intent of the Georgia Department of Community Affairs' "Minimum Standards and Procedures for Local Comprehensive Planning," as amended in 2013, and the Georgia Planning Act of 1989. It is essential that the plan be prepared in compliance with these rules and guidelines for Lumpkin County to maintain their Qualified Local Government (QLG) status. Further, State law requires that the local government update its comprehensive plan every 5 years.

"The purpose of Minimum Standards is to provide a framework for the development, management and implementation of local comprehensive plans at the local, regional and state government level. They reflect an important state interest: healthy and economically vibrant cities and counties are vital to the state's economic prosperity."

(1) Community Goals: *The purpose of the Community Goals element is to lay out a road map for the community's future, developed through a very public process of involving community leaders and stakeholders in making key decisions about the future of the community. The Community Goals are the most important part of the plan, for they identify the community's direction for the future, and are intended to generate local pride and enthusiasm about the future of the community, thereby leading citizens and leadership to act to ensure that the plan is implemented.*

(2) Needs and Opportunities: *This is the locally agreed upon list of Needs and Opportunities the community intends to address. Each of the needs or opportunities that the community identifies as high priority must be followed-up with corresponding implementation measures in the Community Work Program. The list must be developed by involving community stakeholders in carrying out a SWOT (strengths, weaknesses, opportunities, threats) or similar analysis of the community.*

(3) Community Work Program: *This element of the comprehensive plan lays out the specific activities the community plans to undertake during the next five years to address the priority*

DRAFT

1

Needs and Opportunities, identified Target Areas (if applicable), or to achieve portions of the Community Goals. This includes any activities, initiatives, programs, ordinances, administrative systems (such as site plan review, design review, etc.) to be put in place to implement the plan.

In addition to the required core elements local comprehensive plans in Georgia must also include the following:

An assessment of Community Broadband Technology Capacity. *The purpose of the broadband assessment is to facilitate the “promotion of the deployment of broadband internet services” throughout each community in recognition of how vital this technology is for economic development. In an effort to provide advance compliance with this standard the County and municipalities will provide a brief analysis of their needs and objectives regarding broadband technology.*

Consideration of the Regional Water Plan and the Environmental Planning Criteria. *During the process of preparing its comprehensive plan, each community must review the Regional Water Plan(s) covering its area and the Rules for Environmental Planning Criteria... to determine if there is need to adapt local implementation practices or development regulations to address protection of these important natural resources. The community must certify that it has considered both the Regional Water Plan and the Rules for Environmental Planning Criteria when it transmits the plan to the Regional Commission for review.*

As a community that has adopted a form of development regulations the local governments must also include the necessary land use element within their plan to aid in the coordination of their development policies and capital improvement projects.

Land Use Element. *The Land Use Element, where required, must include at least one of the two components listed below:*

(a) Character Areas Map and Defining Narrative. Identify and map the boundaries of existing or potential character areas (see definition in Chapter 110-12-1-.05) covering the entire community, including existing community sub-areas, districts, or neighborhoods.

(b) Future Land Use Map and Narrative. Prepare a Future Land Use Map that uses conventional categories or classifications to depict the location (typically parcel by parcel) of specific future land uses. If this option is chosen, prepare the Future Land Use Map using either of the land use classification schemes described below and include a narrative that explains how to interpret the map and each land use category.

The comprehensive plan was prepared in accordance with minimum procedural requirements for local plans, which include a public hearing prior to substantive work on the plan, and a public hearing prior to transmittal of the comprehensive plan for review by Georgia Mountains Regional Commission (GMRC) and Georgia Department of Community Affairs (DCA).

~
Material for the Purpose, Required Components and Required Procedures has been taken from the appropriate sections of Georgia Department of Community Affairs’ “Standards and Procedures for Local Comprehensive Planning.”

CITIZEN PARTICIPATION

As a part of the planning process, local governments must provide opportunities for public participation, ensuring that citizens and other stakeholders are aware of the effort and how to provide comment. At a minimum, the public participation program must provide for: adequate notice to keep the general public informed of the emerging plan; opportunities for the public to provide written comments on the plan; hold the required public hearings; and provide notice to property owners through advertisements in the newspaper (legal organ) of the planning effort soliciting participation and comments. In addition, the local government must provide opportunities for public participation through other means and methods to help articulate a community vision and develop associated goals and implementation program.

It is noted here that during 2021 much of the world was still feeling the impacts from the Covid-19 Pandemic. While Lumpkin County was not too greatly affected, it did mean that public participation processes would need to adapt. Any public events required appropriate safety protocols, and where possible alternative means for input were encouraged. As a result, this update process employed a variety of involvement efforts such as direct contact with key stakeholders via email and phone conversations, drawing from other source materials to gain insight into local needs, and utilizing online surveys to invite public comment.

The Lumpkin County planning process included multiple outlets for soliciting input, beginning with an Advisory Committee to help guide the direction of the effort. This committee began meeting in the spring of 2021 and met most months through January of 2022. Comprised of key private and public sector stakeholders, the committee provided insight and comment about the state of the community, critical issues to explore during the process, and advised on draft material along the way. This body also served to mitigate the nature of general comment received during public forums and online surveys.

Lumpkin Plan Advisory Committee

C. Towers

For connecting with the general public, the two main avenues were online surveys and open public forums. The online surveys were available for a few months during the fall of 2021, collecting a total of 156 responses. The survey was comprised of 21 questions asking respondents about their thoughts on aspects of present-day Lumpkin County, as well as their ambitions for the future. This information was used to help develop the priorities and opportunities for this edition of the comprehensive plan.

The County also held multiple open public forums inviting residents and stakeholders to provide comments, ask questions, and offer their thoughts on select discussion topics such as land use policies and housing preferences. These forums were held at the Lumpkin County Recreation Center in Dahlonega, which provided a centrally located and easily accessible venue with ample space for attendees. Information from these events was used to aid in aligning priorities and affirming the general accuracy of the vision statement for the community.

CHAPTER 2

COMMUNITY VISION

The Minimum Standards and Requirements for Local Comprehensive Planning defines a community vision as something “... *intended to paint a picture of what the community desires to become, providing a complete description of the development patterns to be encouraged within the jurisdiction.*” It is required as an element of the comprehensive plan so that communities can truly establish a pure and simple ideal for themselves in a format that is easily expressed and understood.

Visioning provides communities with an opportunity to pause and consider the “big picture” as well as to attempt to clearly define their ideal future. Developing a vision means that the community has at least tried to identify current values, describe how they’re to be realized in the future and use that image as a foundation for short and long-term planning. As a process this also requires the community to develop a consensus on what conditions to change or to preserve.

COMMUNITY PROFILE

In 1828, after gold was “discovered” in the northeast Georgia Mountains, men and materials poured into the area as word of gold spread. This boom eventually displaced the last native Cherokee (to begin a journey that became the Trail of Tears) as Lumpkin County was officially established in 1832, carved out of what were then Cherokee, Hall, and Habersham counties.

In 1836, Lumpkin County’s Old Courthouse was built in the center of Dahlonega and is today the oldest public building in North Georgia. In 1838, the U.S. government opened one of the first Federal Branch Mints in Dahlonega. More than \$6 million in gold coins were minted at the site that was later to become the University of North Georgia’s Price Memorial Hall. The university was one of the first Federal Land Grant colleges and is to this day one of the premier military institutions in the nation.

Lumpkin County sits in the foothills of the Blue Ridge Mountains, with much of its territory within the Chattahoochee National Forest. The scenic beauty of this area, along with the history of the region, has fostered a strong tourism industry in the community. Festivals and fairs such as Gold Rush Days, The Mountain Flower Art Festival, and The Bear on the Square Festival bring thousands of people to our town yearly to enjoy the good hospitality and beautiful surroundings. Lumpkin County’s proximity to metro Atlanta, and its position along the way for travelers heading to or from the mountains, has boosted the community’s appeal as a charming destination.

These conditions have also shaped the local economy in other ways. The rugged terrain is regarded as scenic but has limited the potential for major manufacturing and select commercial agriculture operations. As a result, Lumpkin County has been historically a fairly insular

community, reliant on tourism and the university for the modern economy, while evolving as a rural community known for small-town charm and casual, country lifestyles.

COMMUNITY	2010	2015	2019	Δ 2010 - 2019	
				#	%
Lumpkin County	<u>30,282</u>	<u>31,285</u>	<u>33,610</u>	3,328	11.0%
Dahlonega	5,546	6,298	7,294	1,748	31.5%
Unincorporated	24,736	24,987	26,316	1,580	6.4%

STAKEHOLDER INPUT

The effectiveness of any planning process requires identifying the needs that must be addressed to achieve a community's goals, clarifying the targets for the local government. While having the raw data about a community's demographics helps understand current conditions, engaging with area residents, business leaders, and other key stakeholders ensures that the plan will be built upon the interests and ambitions of the public, which helps ensure local leaders will be making future decisions in line with the residents' vision for the community.

Highlights of Public Comments and Survey Results

Do you think the County should seek to expand the tax base to support local facilities and services?

	Yes	No	Maybe
In General	30	9	4
For Specific Facilities/ Services			
Fire Protection	36	4	1
Law Enforcement	39	5	1
Roads	36	5	5
Parks/ Recreation	35	7	4

Previous public comments implied a need for more workforce housing options. Which of the following options do you consider favorable for your community?

	Yes	No	Maybe
Allowing smaller lot size/higher density	1	41	6
Multi-family housing (apartments)	5	29	11
Allowing attached single-family units (duplex/townhomes)	16	23	6
Manufactured homes		43	2

How strongly should the County limit potential impacts of commercial development in rural areas?

	Not at all	A little	Some	A lot	Very
Traffic		2	8	28	16
Noise		6	9	13	25
Lighting		6	7	20	17
Runoff/ Pollution			1	22	27
Other: stop high density					27

Would you favor policies that seek to concentrate commercial growth and development in the southeastern part of the County in exchange for limiting commercial growth north and west of Dahlonega?

Yes:	46
No:	9

Please give us three words you would use to describe...

... how you view Lumpkin County today.		... how you wish to see Lumpkin County in the future.	
#	Value	#	Value
26	Beautiful	21	Rural
18	Rural	20	Beautiful
12	Friendly	10	Historic
11	Nature/ Natural Beauty	10	Nature/ Natural Beauty

10	Historic/ History	9	Peaceful
10	Quaint	6	Quiet
9	Safe	5	Clean
6	Home	5	Community
5	Charming	5	Family/ Family-friendly
5	Family	5	Friendly
5	Growing	5	Quaint
5	Quiet		
5	Unique		

SWOT Analysis

One facet of the public input process asks communities to assess the information outlined to identify their respective Strengths, Weaknesses, Opportunities, and Threats. In doing this SWOT analysis the communities can more effectively define their objectives and actions to as to better achieve the desired vision.

This part of the planning process also reviewed various forms of data and information about each community. Information such as Census data and Department of Labor data was reviewed for insight into local conditions, plus each local government was asked to provide summaries of their immediate operational and capital improvement needs to give an indication of their priorities ahead of discussions about public objectives. When evaluating this data and information the planning process focused on whether it verified needs or opportunities identified previously, whether it uncovered new needs or opportunities not previously identified, and whether it indicates significant local trends that need to be considered in the planning process.

STRENGTHS/ KEY ASSETS	WEAKNESSES/ LIABILITIES
Mountains/ St. Parks/ National Forest UNG Hospital GA 400 Rural character Low cost of living Safe hometown Access to metro Atlanta Strong tourism industry Yahoola Creek Park/ Parks and Rec amenities	Limited thoroughfare access Need improved broadband connectivity Land use policies need updating Gaps in workforce/starter housing supply Limited options for commercial tax base Limited options for groceries Need for road improvements
OPPORTUNITIES/ UNIQUE POSSIBILITIES	THREATS/ OUTSIDE RISKS
Expansion of GA 400 Potential medical hub with hospital relocation Chance for new/ smart growth Opportunity for more agritourism	Managing potential conflicts from growth Possible rapid growth from metro Atlanta

The Big Ideas

1.	Preserve Lumpkin County's rural character	
	<i>Residents, visitors, and local business leaders cherish the scenic beauty and pastoral nature of the community. They appreciate economic development and expect some change, but are desperate to maintain the rural, Appalachian character that currently defines the hometown they love.</i> <i>Lumpkin County can take several measures to improve how their land use codes better achieve the objectives laid out in the Recommended Character Areas. Improvements to their codes, along with a clearer and streamlined development review policy, will make it easier for the County to manage development in a fashion that preserves rural character without impeding economic growth.</i>	• Develop a greenspace strategy • Support local agricultural interests • Update land use policies to mitigate impacts of new development • Target utility and infrastructure improvements in ways compatible with rural character • Create a development strategy for an expanded GA 400 corridor
2.	Focus economic development on industries compatible with our rural character	
	<i>There is a demand for more and better job opportunities, and overwhelming support for increased retail options that cater to residential needs (such as groceries). The desire among residents is that efforts supporting business expansion do so with an emphasis on sustaining the community's rural character, minimizing the potential nuisances of the need for major impacts on the landscape.</i> <i>Given the right support and resources, the Development Authority can more actively seek out businesses suitable for rural communities and providing residents with the additional retail options desired. A formalized strategy and additional staff assistance will also allow the Authority to better assist existing companies in the area.</i>	• Support local agricultural interests • Update land use policies to mitigate impacts of new development • Target utility and infrastructure improvements in ways compatible with rural character • Create an Economic Blueprint Strategy • Support the Development Authority • Maintain Broadband Ready status

The Big Ideas

3.	Pursue & celebrate government efficiency and effectiveness
	<i>Expectations and demands regarding how governments communicate with their residents and business leaders has evolved. New technologies and a heightened awareness of Lumpkin's potential means citizens may have different performance measures than past generations. Today's citizens want efficiency, but they also expect a quality return on their investments.</i> <i>The County already employs a version of vehicle tracking software and has versions of financial information available to the public. Modest updates to how this information is collected and shared, along with incorporating the same long-term budgeting for facilities, personnel, and major equipment purchases, can not only invite more effective financial planning but can assist in demonstrating to the public how the County is acting wisely in accordance with their goals.</i> • Adopt a formal Communications Policy that emphasizes public relations • Establish departmental reports for long-term capital improvement planning • Consider performance measures (or similar) for annual budgeting and project planning
4.	The County must address evolution of housing types and affordability
	<i>Housing affordability is critical today, particularly among workforce/ starter units and senior-friendly units. Competition from UNG can affect supply and pricing, as will restrictions from topography and limited utility access. As the County updates their land use codes, they should consider how new trends (short-term rentals, tiny housing...) may impact local markets, and seek policies that preserve local character.</i> <i>An exercise in formally reviewing how different housing types do or do not work within Lumpkin County can assist in guiding how to make the best out of local ordinances and show to the public how various types will preserve the area's low cost of living.</i> • Update land use policies to mitigate impacts of new development • Target utility and infrastructure improvements in ways compatible with rural character • Develop a comprehensive housing study (with Dahlonga and UNG)

VISION STATEMENT

A vision for the community's future must be included in the comprehensive plan. The community vision is intended to provide a complete picture of what the community desires to become. The community vision must be based on public input, the assessment of current and future needs and be supported by the goals, policies and objectives in the comprehensive plan. In addition, there must be consistency between the community vision and the Georgia Department of Community Affairs Quality Community Objectives as well as consistency with the community visions of other communities within the region.

The current vision statements originated from the previous planning cycles, where they were derived from the various comments and suggestions raised during public meetings and through the available survey process. They encapsulate the basic principles and values desired by existing residents and stakeholders, particularly in illustrating the manner in which each community wishes to retain their existing character while simultaneously embracing some change, which seems inevitable based on regional growth patterns.

"Lumpkin County: A historic mountain community that values small town tradition and balances responsible, focused growth, while also promoting quality of life and the experience of recreational living with southern charm."

The most common words used to describe each community reflected the values typically associated with small communities: Rural, Safe, Quiet, and Small-Town Charm. These traits were used to define Lumpkin County as it is today and largely how people would like to see it in the future. The sense is to retain the rustic character of the community while finding specific places and manners in which new development can blend in. The predominant line of thinking to that end, then, is to concentrate development near the southern boundary or near Dahlonega, particularly restricting heavier development such as commercial and industrial activity, to select spots along GA 400.

CHAPTER 3

COMMUNITY ASSESSMENT

BROADBAND ASSESSMENT

The growing importance of access to reliable and high-speed, high-capacity internet connections cannot be overestimated. Unserved and underserved areas of Georgia will not remain economically competitive without sufficient internet infrastructure, as this technology becomes the default utility for all manners of communication. To address this issue the Georgia General Assembly amended the provisions of local planning in Georgia by passing the "*Achieving Connectivity Everywhere (ACE) Act*" to facilitate the enhancement and extension of internet access in communities. The ACE Act requires all local governments to incorporate the "*promotion of the deployment of broadband internet services*" into their local plan. Once these are in place the Georgia Department of Community Affairs and the Department of Economic Development will identify and promote facilities and developments that offer broadband services at a rate of not less than 1 gigabit per second in the downstream to end users that can be accessed for business, education, health care, government.

One of the first products to come out of the Georgia Broadband Initiative was an inventory of general conditions across the State regarding access to high speed/ high-capacity broadband technology. Utilizing demographic data from the US Census Bureau and cross-referencing that information with knowledge of broadband infrastructure, the Department of Community Affairs produced a series of maps depicting the state of broadband accessibility in rural areas.

Lumpkin County Broadband Access - 2021

The map portrays broadband statistics for the State of Georgia. Statistics are available by census block, county and legislative boundary. Statistics are based on a fixed, terrestrial broadband definition of 25 Mbps down and 3 Mbps up, and where the broadband service is available to more than 80% of locations in a census block. Census blocks that did not meet this definition are delineated as 'Unserved'. The map depicts access to broadband, not subscription status.

In assessing Lumpkin County's 2019 access to higher grade broadband technology, stakeholders were asked to rate the general satisfaction of existing internet service providers and the County provided information about the general distribution of high-capacity lines throughout the area. The majority provider within the area (based on geographic area) is Windstream, for which service ratings were considered below average. Both Windstream and Comcast provide major commercial service in the GA 400 corridor, along arterial roads leading westward from GA 400, to Dahlonega, and along various roads throughout the unincorporated County. There are, however, several gaps in "last-mile" connectivity along more remote rural roads, particularly regarding higher speed and higher capacity lines.

The County does have access to the North Georgia Network (NGN), an incorporated cooperative providing a regional fiber optic system with over 1,600 linear miles of infrastructure. The NGN was conceived with hopes for a more prosperous rural Georgia, knowing that a fast, reliable, and affordable fiber optic network is vital to modern economic development. The NGN provides infrastructure with 100 gigabit core line and connects to almost all the schools and colleges in the region as well as reaching many government structures and prominent business parks

NGN map of service lines in the Lumpkin County area.

As an additional reference, Lumpkin County and Dahlonega were included in the 2014 Georgia Mountains Digital Economy Plan (DEP), one of several such plans developed for each region across Georgia in accordance with standards defined by the Georgia Technology Authority (GTA). The DEP was designed to identify and coordinate the resources and efforts related to improving the region's infrastructure in support of hi-tech industries and economies. As each regional plan is completed, the State and its partners can begin directing their energy and resources with clearer focus and understanding of needs from every part of Georgia. While specific investment actions have not been identified as part of this initial process, the DEP provides a work scope that addresses key focus areas and recommendations that will help the GMRC, its member governments and regional stakeholders move forward with an understanding of the regional and state context for building network connectivity, improving educational resources and fostering technology hubs. With continued coordination and monitoring of progress, it is hoped these efforts will make the region a more effective and efficient place enabling all manners of business to realize their potential in accessing and utilizing electronic data.

In 2019 Lumpkin County surveyed key stakeholders in the community regarding broadband service in the area. Based on comments and indications, the biggest hurdle for broadband access within Lumpkin County is addressing available speeds and sustaining service without interruptions. Respondents to the input process indicated that services outside of Dahlonega and

the GA 400 corridor were typically slower and weaker. The same comments were applied to all service providers in the area, with special concern levied over the prospect for the local networks to handle increasing loads of streaming media. Everyone considered it of vital importance for economic development in the community that providers strive to upgrade capacity and speed so as to minimize issues related to slower, interrupted service.

While ultimately everyone wished to see improved service capacity brought to all parts of the county, the majority of respondents echoed the theme that the city and the GA 400 corridor are the priorities, both to promote further economic growth and to sustain existing industry while keeping the rest of the county rural. Some additional investment in expanding the networks south of Dahlonega was also seen as favorable, under the assumption most new development would be coming from that direction. So, the generalized plan is to strengthen the service in the key areas and then address long term goals for last-mile connectivity throughout Lumpkin.

	Broadband Service	
	@ Residence	@ Workplace
Locations of Respondents	West of Dahlonega (35%) In Dahlonega (29%)	In Dahlonega (71%) South of Dahlonega (12%)
Avg. Satisfaction Rating (1 = Poor, 5 = Great)	2.7	3.1
Top Issues (1 = Low, 6 = High)	5.15 Speed 4.15 Service Interruptions 4.00 Capacity	5.08 Speed 4.42 Service Interruptions 4.25 Capacity

Priorities for Future Network Enhancements

- *Improve performance within/around Dahlonega and GA 400 corridors*
- *Extension of higher-capacity trunk lines from NGN*
- *Long-term plan for "last-mile" connections*

After providing documentation to the Georgia Department of Economic Development (GDEcD), Lumpkin County will be recognized for its completion of the application and compliance by adopting a local comprehensive plan inclusive of broadband services deployment and a Broadband Model Ordinance. The Gateway Corridor Overlay District in Lumpkin County is the first to receive a Broadband Ready Community Site designation.

ENVIRONMENTAL ASSESSMENT

A region's natural resources are the native conditions and elements that contribute to the local character and livelihood, such as the rivers and lakes supplying public water, mineral deposits that support local industry, or a scenic park serving locals and tourists. These resources can, when properly managed, greatly serve a community's health, culture, and economy. However, because these sites and conditions are highly susceptible to disturbance from human activity, they are also regarded environmentally sensitive and need to be preserved for public benefit.

Clean Water Act Compliance

Y	Any "not supporting" 303(d) listed waterbodies? (See Below) <i>If yes, these waterbodies have been found contaminated to the extent that they are not considered supporting their designated use. As such the local community should seek to manage land uses within the watershed so as to yield healthier water quality.</i>
Y	Any 305(b) listed waterbodies? (See Below)
N	<i>If yes, do the Implementation Plans/Watershed Management Plans require any outstanding actions from the local government? If so, please include these actions within the Implementation Program.</i>

Georgia employs two tiers of water quality standards for environmental planning purposes: A general criteria applicable to all waters and more detailed, specific criteria for each of six designated uses. The general criteria (shown below) are qualitative and reflect the goals for Georgia's streams, rivers, ponds and lakes. These are established to ensure consistency across resource initiatives and to keep a comprehensive perspective in everything EPD does for maintain water quality. Once designations are made, the State of Georgia assesses its water bodies for compliance with water quality standards criteria established for their designated uses as required by the Federal Clean Water Act (CWA). Assessed water bodies are placed into one of three categories depending on water quality assessment results: *Supporting* designated use, *Not Supporting* designated use, or *Assessment Pending*. These water bodies are found on Georgia's 305(b) list as required by that section of the CWA that addresses the assessment process and are published in Water Quality in Georgia (GA EPD, 2019).

Lumpkin County currently features 13 stream segments that are listed as Not Supporting their designated use, and another 4 with their assessment pending. These waters are the ones in need of ongoing monitoring and possible future mitigation to ensure the water quality does not become so impaired as to harm wildlife or people. Most of the pollution issues in Lumpkin County concerns Fecal Coliform bacteria (typically in the form of animal waste) or Biota – Fish impairment (commonly associated with chemicals like phosphates), with both attributed to non-point source contamination, meaning the polluting agents aren't coming from a pipe or obvious source but are instead washing into the streams from broad areas. Currently, the County and Georgia EPD have plans in place to address these issues, with most streams having already been reviewed as part of a watershed management plan or comparable assessment. So long as the County continues to enforce proper standards and that all stakeholders encourage best practices regarding livestock management and chemical applications it is hoped the conditions will improve.

Lumpkin County also has another 16 streams that have been monitored as part of past contaminant concerns but that have since been restored to supporting standards. These streams are still tested and monitored by EPD, however.

STATE LISTED WATER BODIES IN LUMPKIN COUNTY

Environmental Planning Criteria

Characteristic	Lumpkin County	Dahlonega
<i>Floodplains</i>	Y	Y
<i>Forest Lands</i>	Y	
<i>Ground Water Recharge Areas</i>	Y	
<i>Plant & Animal Habitat</i>		
<i>Prime Agricultural Lands</i>		
<i>Protected Mountains</i>	Y	
<i>Steep Slopes</i>	Y	
<i>Water Supply Watersheds</i>	Y	Y
<i>Wetlands</i>	Y	Y
<i>Protected Rivers</i>	Y	Y

Within Lumpkin County are several resources covered by the *Environmental Planning Criteria*. The Criteria was established through the Georgia Planning Act as a method of identifying minimum standards that should be implemented to protect Georgia's most sensitive natural resources including wetlands, water supply watersheds, protected rivers, groundwater recharge areas, and mountain protection areas. Local governments are encouraged to adopt regulations for the protection of relevant natural resources to maintain their eligibility for certain state grants, loans, and permits. DNR has developed model ordinances to be used as guides for local governments as they develop the necessary regulations to meet EPD standards. Lumpkin County has regulations in place to address these environmental conditions, however from time to time it may review these standards and policies to see if they need revisions or updates.

Throughout this process, Lumpkin County understands their need to be compliant with all applicable State laws and regulations regarding environmental planning and protection. This is to certify that as part of this planning process appropriate staff and decision-makers have reviewed the *Coosa-North Georgia Water Plan*, the *Georgie Mountains Regional Plan*, and the *Georgia State Rules for Environmental Planning Criteria* (O.C.G.A. 12-2-8) and taken them into consideration in formulating this local plan. No conflicts were identified between this document and the other documents

COMMUNITY FACILITIES & SERVICES

Public facilities and services are those elements vital to a population's health, safety, and welfare that are most effectively provided by the public sector, such as sewerage, law enforcement and school services. This element examines the community's ability to adequately serve the present and projected demands for such services, identifying concerns with the spatial distribution and conditions affecting service delivery. These assessments can then assist in projecting future demands and in planning future capital improvement projects.

The staff for Lumpkin County were surveyed independently for their thoughts on the existing levels of performance for their departments and needs for their department in order to sustain levels of service as the county grows and changes. The following represents a summary of their identified needs and priorities.

Department	Does your Dept. have a long-range plan and budget?		Do you have needs to maintain existing LOS?		Do you have needs if the County grows?	
	Yes	No				
Communications / 911		X			X	
Animal Shelter		X			X	
Development Authority		X			X	
Finance		X		X	X	
Public Buildings	X				X	
Public Works		X		X	X	
Roads and Bridges					X	
Special Projects	X			X	X	
Tax Office				X	X	
Human Resources		X			X	

Targeted Needs/Objectives by Department

Animal Shelter

- Additional staffing will be needed as demand for services grows with population
- There are repairs needed for the current facility, but long-term demand may require a new shelter on property which allows for future expansion and an area to house livestock
- Need additional animal control vehicles and a livestock trailer

Development Authority

- Need land and infrastructure to support development.
- Need to clarify/ streamline communications about the commercial development process
- A guaranteed source of funding – such as up to 1 mill, a special tax district along the Gateway Corridor, SPLOST, or general fund for organization administration
- An “Economic Blueprint” that includes a target industry analysis
- Need additional staff/ administrative help to achieve work program

Finance/ Special Projects

- Need inventory tracking system (2022)
- Project management and facility tracking software

Public Works/ Roads and Bridges

- Resources enabling more preventive maintenance work
- Heavy equipment operators and CDL drivers
- Ton-Dump truck

Parks and Rec

- More gyms and more ball fields
- Update options for extracurricular activities and entertainment for children and seniors

911

- Additional staffing will be needed as demand for services grows with population
- Replacement of existing radio dispatch console equipment and software
- Secondary PSAP location.

LAND USE ASSESSMENT

Land use management policies and programs represent guidelines for shaping development patterns that provide for efficient growth while also protecting sensitive social and environmental areas. As such communities should take into account their current and immediately projected conditions and assess the identified needs and issues regarding the built landscape and community services for the area. This section presents an inventory of existing land use patterns and development trends for the community, allowing the local government to produce the most effective policies needed to manage the demands from projected development.

Development Trends

Like much of northern metropolitan Atlanta, Lumpkin County and the neighboring jurisdictions are receiving more and more development each year. New residential developments creep toward the mountains as households seek cheaper land and/or more attractive, rural places to reside while still retaining commuting distance to employment options. As this happens, more and new forms of commercial activity follows, trying to capitalize on the growing customer base.

For now, most of the growth within Lumpkin County is centered on the southern end, along the GA 400 corridor or immediately west thereof. The node of GA 400 and SR 60 contains the most prominent commercial center outside of Dahlonega, served by the divided four lane arterial road and the available utilities. West of this, in the part of Lumpkin County between Dahlonega and Dawsonville, is the area that's seen the most request for development permits in the past 5 years. Even without significant investment by the County it appears at least some growth will come to this area as Dawson County to the south welcomes the encroaching suburbia.

To the west of Dahlonega, the Iron Mountain development began construction of what is a outdoor recreation destination encompassing hundreds of acres. Phase 1 of the project is slated to include rental cabins, RV campsites, a commercial hub with restaurant, offices, and a welcome center, an event venue, and trails for motorcycles and ATVs. There are plans for further expansions depending on the success of the destination.

UNG continues to grow their campus and facilities, with the Dahlonega campus now hosting upwards of 7,000 students. The success of the University provides opportunities for economic growth in the area, but also presents conflicts as UNG and private citizens compete for land and, most notably, affordable housing. The University will invariably increase their footprint outside of the City over time, driving the investment of infrastructure and utilities to expand the urbanized portions of the county.

Northeast Georgia Medical Center is relocating the hospital currently in Dahlonega to a new campus along GA 400, south of the intersection with SR 60. Once completed by 2025, this facility will anchor additional office activity and has already attracted interest from developers for supporting commercial activity.

Areas Requiring Special Attention

Analysis of the prevailing trends will assist in the identification of preferred patterns of growth for the future. More specifically such analyses can identify those areas requiring special attention regarding management policies, such as natural or cultural resources likely to be intruded upon or otherwise impacted by development. As part of this process, stakeholders and local

governments are encouraged to evaluate the presence of subsets of their communities subject to special circumstances such as:

- ✓ *Areas where rapid development or change of land uses is likely to occur*
- ✓ *Areas where the pace of development has and/or may outpace the availability of community facilities and services, including transportation*
- ✓ *Areas in need of redevelopment and/or significant improvements to aesthetics or attractiveness (including strip commercial corridors)*
- ✓ *Large, abandoned structures or sites, including possible environmental contamination.*
- ✓ *Areas with significant infill development opportunities (scattered vacant sites).*
- ✓ *Areas of significant disinvestment, levels of poverty, and/or unemployment substantially higher than average levels for the community as a whole*

Upon consideration of development trends and land use issues in Lumpkin County, the following priorities stand out for the planning period:

Suburban Development Area – This is the portion of Lumpkin County experiencing the most activity regarding development permits in the past 5 years, due in large part to the proximity to metropolitan Atlanta and the presence of both GA 400 and, in select areas, water and sewer. This area is susceptible to the same development pressures as neighboring Dawson County to the south, where households and businesses are seeking cheaper land options than more developed areas while still maintaining access to the metropolitan growth. This is the area where Lumpkin County must plan for the most change, and likely the most dynamic forms of change.

Gateway Corridor –

Economic Activity Center – This is the portion of GA 400 stretching from SR60 southward to the Dawson County line. This area includes existing commercial development as well as the area for the proposed Northeast Georgia Medical Center and other anticipated retail and offices. It will be a growing economic engine for the community as businesses tap into the residential growth of the area and the increasing traffic flow along the corridor.

Future GA 400 Corridor – This is the corridor running northward from the current northern terminus of GA 400 at the intersection of SR60, along the approximate route of where GA 400 will someday be extended all the way to Cleveland. It is expected to mostly follow the route of SR115, and will mostly take on the divided four-lane arterial capacity of the existing GA 400. This area already includes plans for expanded water and sewer capacity and will likely receive strong development interest in once the roadway comes online.

RECOMMENDED CHARACTER AREAS

Character area planning incorporates the concept of community function and feel to identify neighborhoods or communities of similar interaction, process, and character. Defining character areas is useful for identifying unique characteristics that provide a sense of community and to discern localized functions within the larger city or county context. Once character areas are established, community leaders can develop and implement strategies to promote the unique qualities of each character area.

The prevailing character and context of a community influence development forms and scale. Such elements are often identified as sub-areas within the community, such as neighborhoods, defined by architectural scale and style, functions and roles, traffic flow, and other factors that differentiate one area from the next. As such, a character area is a specific geographic area that meets the following criteria:

1. Has unique or special characteristics;
2. Has potential to evolve into a unique area when provided specific and intentional guidance; or
3. Requires special attention due to unique development issues.

Character areas are often times identified based on environmental and/or physical characteristics of an area and it is not uncommon for communities to define their physical spaces based on a combination of both.

The Recommended Character Areas represent a starting point in the discussion of the overall development strategy. Boundaries, descriptions, and vision statements for future development were created during the community participation process.

The recommended character areas for Lumpkin County are as follows:

- Rural Places
- Residential Growth
- Recreation/Open Space/Conservation
- Neighborhood Village Center
- Community Village Center
- Transportation/Communication/Utilities
- Commerce Corridor
- Gateway Corridor
- Agricultural Preservation
- Industrial
- Public/Institutional

Rural Places

The Rural Places district is intended for development as rural residential communities connected to the agricultural, economic, environmental, and aesthetic features of the rural and natural landscape through practices such as clustering development at farmsteads and large lot homesteads, crossroad hamlets, or within large lot conservation and master planned developments.

Many areas of Lumpkin County are shifting from an agricultural base to one of mixed residential, commercial and industrial land development. The intent of the Rural Places category is to provide a residential-agricultural community, which benefits from its scenic rural landscape with much of its identity based on its agrarian past while accommodating residential growth. This residential category is located primarily between the middle portion of the County to the southern portion of the County.

Development Encouraged

- Low density residential
- Cluster Developments
- Large lot homesteads
- Crossroad Hamlets
- Large Lot Conservation
- Residential Master Planned Communities
- Silviculture/ Forestry
- Wildlife Management Areas

Implementation Measures

- Conduct forum reviewing/amending development regulations as needed
- Develop design guideline reference material
- Develop *Iconic Images* database

Residential Growth

Residential growth areas are intended for conventional subdivisions and commercial nodes. Development in this area will be characterized by smaller lot sizes and a greater variety of housing types.

The intent of this character area is to channel growth pressures to areas that are suitable in terms of land use patterns and infrastructure investment, and to areas that have a more “urban” feel. Areas designated as Residential Growth Areas are located primarily within areas that are currently experiencing urbanization and growth pressures, such as outside of City of Dahlonega and within areas that public water & sewer and transportation investment are planned. Minimum lot size varies by type of unit and whether public water and sewer serves the lot. This character area is located between the middle portion of the County and the southern portion of the County.

Development Encouraged

- Medium-density residential
- Single-family housing
- Conventional Subdivisions
- Townhomes/Multi-Family
- Cottage Industries
- Residential Businesses

Implementation Measures

- Conduct forum reviewing/amending development regulations as needed
- Develop design guideline reference material
- Develop *Iconic Images* database

Neighborhood Village Center

Neighborhood village centers are intended for small-scale commercial uses designed to serve daily local needs of the surrounding area. These uses will generally be retail or service oriented and be located in buildings between 3,000 and 6,000 square feet, but not more than 30,000 square feet.

Neighborhood centers are located throughout the county at major crossroad areas, and have developed over the years to serve local needs. These areas are typically rural in character and tend to attract residents who desire single-family homes on large lots. Thus, a neighborhood center is envisioned as a compact assortment of convenience-oriented retail stores and services to address the demands of adjacent residents in less urbanized parts of the county, focusing on historic or natural resources of the area. Adaptive re-use of historic structures and buildings is encouraged as a focal point. This character area is generally located at major crossroads or intersections.

Development Encouraged

- Banks
- Convenience Stores
- General Merchandise Stores
- Drug Stores
- Gas Stations
- Hardware Stores
- Small Offices (doctor, attorney, etc.)
- B&B's, inns and lodges
- Lofts within mixed use developments

Implementation Measures

- Amend/adopt development regulations as needed
- Refer to/develop design guideline reference material
- Develop *Iconic Images* database
- Develop/ Implement streetscape plan

Community Village Center

Community village centers are intended for commercial, office, and mixed-use developments that serve a region or a larger area than the immediate neighborhood.

Typically located at the convergence of major transportation corridors, Commercial Village Centers are envisioned as places where a compatible mixture of higher intensity of uses, such as larger scaled shopping centers, professional office and services are located. Mixed-use developments that combine residential, commercial, service and recreational uses integrated and linked together by a comprehensive circulation system are encouraged in these nodes. Community village centers include shopping and service facilities that offer a wide variety of goods and services, including both convenience goods for neighborhood residents and shopping goods for a market area consisting of several neighborhoods.

Development Encouraged

- Restaurants
- General Merchandise Stores
- Midsize Office Buildings
- Business Support Services
- Private Enrichments Schools
- Hotels & Motels
- Small Automotive Repair
- Mixed Use Dwellings
- Regional Public/Institutional Facilities
- Planned Shopping & Business Centers

Implementation Measures

- Amend/adopt development regulations as needed
- Refer to/develop design guideline reference material
- Develop *Iconic Images* database
- Develop/ Implement streetscape plan

Commerce Corridor

Commerce corridors are intended for commercial, industrial, and other employment uses that do not have significant impacts on the environment or on nearby properties. Examples of these uses include office and business parks, large scale commercial sites, office-warehouse centers, distribution/service facilities, industrial sites, high-technology and research uses, wholesaling companies, and similar businesses. Because of the intensity of use and its potential relationship to residential uses, intensive industrial uses are discouraged in this character area.

Commerce Corridors are envisioned as destinations for expanded interstate trade opportunities that accommodate higher densities in order to create a synergy between retail, office, industry and other commercial uses. Less pedestrian oriented than Neighborhood or Community Villages, Commerce Corridors are dependent upon access not only to transportation networks, but also to technology and communication infrastructures.

Development Encouraged

- Heavy Commercial/Manufacturing Uses
- Car, Boat, and Manufactured Home Sales
- Truck Stops, Repair and Service
- Heavy Automotive Repair
- Building Contractors w/ Outdoor Storage
- Lumber Yards
- Business Parks
- Light Industrial
- Distribution, Warehousing & Wholesale

Implementation Measures

- Amend/adopt development regulations as needed
- Refer to/develop design guideline reference material
- Develop *Iconic Images* database
- Develop/ Implement streetscape plan

Gateway Corridor

Gateway corridors are intended large-scale commercial, office, technology, and distribution uses along major roadways and transportation corridors.

Several major road corridors are considered to be scenic rural vistas: State Route 400, State Route 60, State route 52 and Long Branch Road. Georgia 400 and State Route 60 provide the "Gateway" into the County and the City of Dahlonega. In order to maintain the rural and scenic vistas that are important to the county's citizens this area requires special treatment to assure proper development along the entrance into the county. From an urban design standpoint, the most critical element in creating a visually appealing gateway corridor is the enforcement of appropriate development standards to ensure adequate site plans and landscaping. Buffers are critical between incompatible uses and guidelines that address signage and lighting will help to mitigate the negative impacts of a high concentration of commercial uses. Vast amounts of parking and loading/unloading areas should be screened from view. Where possible the parking areas should be distributed to two or more sides of the business to "visually scale down" the size of the parking lot. Inter-parcel access between sites should be used whenever possible. Grouping or "clustering" of shops with co-mingled parking, landscaping and pedestrian areas in encouraged. In addition, certain commercial uses such as car dealerships, truck terminals and car washes require careful site planning to minimize curb cuts and reduce the perception of parking as the primary use.

Development Encouraged

- Large Commercial Uses (Regional Retailers)
- Corporate Offices
- High Technology Uses
- Campus Style Light Industrial
- Office Parks & Buildings
- High Density & Mixed Use Housing
- Distribution, Warehousing & Wholesale
- Inter-parcel access
- Grouping/Clustering of shops

Implementation Measures

- Amend/adopt development regulations as needed
- Refer to/develop design guideline reference material
- Develop *Iconic Images* database
- Buffering between incompatible uses
- Guidelines addressing signage and lighting
- Minimize curb cuts
- Parking distributed to 2 or more sides of building

Agricultural Preservation

Agricultural preservation areas are intended for uses such as conservation, farming, commercial agricultural uses, and very low-density large lot residential development. "Conventional" subdivision development is discouraged in this character area, and maintaining distance between active agricultural uses and new residential uses or other incompatible uses is emphasized.

Farming is a viable and desirable way of life within Lumpkin County. It provides jobs, contributes to the local economy and creates demand for support business. Lumpkin County also depends on the scenic beauty created by open pastureland, cultivated cropland, and managed woodland to attract tourists to hike on its trails, stay in its bed and breakfasts and to buy local crafts and food products. Family farms, agricultural operations, conservation areas, vast natural and scenic resources and a rural landscape are a large part of the community's identity and culture.

The preservation of the overall rural character and the preservation of the family-farming heritage are high priorities for the citizens of the county. The intent of the Agricultural Preservation Character Area is to preserve and reduce development pressure on existing conservation and agricultural uses, provide areas for future expansion of these uses and to provide for compatibility standards to lessen the impact between non-compatible uses, especially residential and active agricultural uses. This character area encourages active conservation, farming, commercial agricultural uses and very low-density large lot residential development. This character area discourages "conventional" subdivision development, and acts as a buffer as suburban development creeps into the County's agricultural areas. Because of this rural orientation, it is expected that a lower level of public services and facilities be provided to lessen development pressure in the area.

Development Encouraged

- Low-density residential (cluster developments and large lot homesteads)
- ~~Rural areas throughout the County~~
- Agricultural operations
- Silviculture/ Forestry
- Wildlife Management Areas

Implementation Measures

- Conduct forum reviewing/amending development regulations as needed
- Develop design guideline reference material
- Develop *Iconic Images* database

Industrial

Industrial areas are intended for uses that are likely to have negative impacts on neighboring properties or the surrounding area, and particularly those uses that could be potentially dangerous to health, safety, or general welfare if located near residential development.

This area is established to provide for intensive industrial uses such as landfills, quarries, and other industrial uses that are potential public nuisances, are identified as environmentally hazardous or are potentially dangerous to health, safety or general welfare of the county.

Development Encouraged

- Landfills
- Quarries
- Intensive Industrial Uses

Implementation Measures

- Amend/adopt development regulations as needed
- Refer to/develop design guideline reference material
- Develop *Iconic Images* database
- Develop/ Implement streetscape plan
- Buffering between incompatible uses
- Guidelines addressing signage and lighting
- Minimize curb cuts

Recreation/ Open Space/ Conservation

The **Recreation/ Open Space/ Conservation** land use classification is for those areas within the county that have been developed for park or recreation use or are designated open space. The recreation and park areas illustrated on the Proposed Character Area Map include existing or proposed neighborhood, community and regional parks, recreation facilities and golf courses. Not all developed or needed open space areas are indicated on the map. Open space is required in all Open Space and Subdivisions and Master Planned Developments submitted to the County and may be required in other developments when necessary to address recreational and aesthetic concerns, or to create a buffer between different land uses, or as required by the Land Use Code. This category also includes rivers and stream buffers established by law and open space protected by conservation easements. This character area may also include nature preserves, interpretative areas, wildlife management areas, national forests and areas held in their natural state.

Development Encouraged

- Park spaces
- Golf Courses
- Recreational Facilities
- Sport Fields
- Playgrounds
- Silviculture/ Forestry
- Wildlife Management Areas

Implementation Measures

- Amend/adopt development regulations as needed
- Refer to/develop design guideline reference material
- Develop *Iconic Images* database
- Develop/ Implement streetscape plan
- Buffering between incompatible uses
- Guidelines addressing signage and lighting

Public/Institutional

This designation includes existing sites and facilities in public ownership for such uses as medical, educational, cultural, governmental, administrative and protective services, and cemeteries. Existing churches are also included in this category. Uses within this character area are typically concentrated in specific locales. The majority of public and institutional uses are located within the County Seat of Dahlonega. There are, however, several educational facilities located outside of Dahlonega.

Development Encouraged

- Medical Facilities
- Educational Facilities
- Cultural Facilities
- Government Facilities
- Cemeteries
- Churches

Implementation Measures

- Amend/adopt development regulations as needed
- Refer to/develop design guideline reference material
- Develop *Iconic Images* database
- Develop/ Implement streetscape plan

Transportation/Communications/Utilities

This category designates existing electric substations, telephone facilities, cable TV, transmission towers, satellite downlink operations in the county as well as roads and highways. There are no known plans for future locations for such facilities, which will be considered on a case-by-case basis. The category also includes all streets and highways in the county.

Development Encouraged

- Electric Substations
- Telephone Facilities
- Cable TV
- Transmission Towers
- Roads and Highways

Implementation Measures

- Amend/adopt development regulations as needed
- Refer to/develop design guideline reference material
- Develop *Iconic Images* database
- Develop/ Implement streetscape plan
- Buffering between incompatible uses
- Guidelines addressing signage and lighting
- Minimize curb cuts

CHAPTER 3

IMPLEMENTATION PROGRAM

While the Future Development Map illustrates the physical conditions expressed within the Vision, the Implementation Program is the overall strategy for achieving the Community Vision and for addressing each of the Community Needs and Opportunities. It identifies specific measures, both short and long-term, that must be undertaken by the community in order realize the community's goals.

The Implementation Program features four main components.

Community Needs and Opportunities

These reflect an assessment of the conditions and factors influencing the area and people, stakeholder knowledge of the community and comments received throughout the planning process. In order to effectively realize their vision for the future a community must develop a well-defined implementation plan. By identifying the core issues and priorities of the community, the government and its partners can develop specific strategies that must be accomplished to fulfill the desired goals and objectives of the vision. It is critical that these issues and opportunities be clearly defined and understood by the stakeholders because they form the basis for the development of the community's long and short-term action plans.

Reports of Accomplishments

This is the review of the Work Program (CWP) from the previous five years. As a new CWP is produced every five years, the items within the previous CWP must be identified for their status as complete, in progress, either postponed or cancelled. Those items that have been postponed or are in progress must be shown in the next CWP where appropriate, while those items that have been postponed or cancelled must also include a reason for their status.

Community Work Program

The third forward-thinking element of the Implementation Program is the CWP. This identifies specific implementation actions the local government or other entities intend to take during the first five-year time frame of the planning period. This can include any ordinances, administrative systems, community improvements or investments, financing arrangements, or other programs or initiatives to be put in place to realize the plan goals.

Note: Some items listed will explore assistance through the Georgia Mountains Regional Commission (GMRC) via their discretionary contract elements with the Department of Community Affairs (DCA). These items will include "DCA" under the list of potential funding sources.

Policies and Long-Term Objectives

One type of action a community can establish to achieve its vision is the establishment of policy. These are those ongoing principles and practices that the community will observe in order to realize specific objectives. Some policies may compliment single action-items while others may provide ongoing guidance and direction to local government officials for making decisions consistent with achieving the Community Vision or addressing Community Issues and Opportunities.

NEEDS & OPPORTUNITIES

Needs and Opportunities	Proposed Mitigation Measures
Need to revise land use code to mitigate unintended consequences of commercial use in rural areas	• Update Land Use Policies to clarify and define uses allowed to reduce the number of SLU applications • Use new PUD as a model • Create tool for calculating public costs of new development • Create master plan for infrastructure improvements
Consider regulations for nuisance activities	• Update Land Use Policies, with an emphasis on management of nuisances
Need to assess housing market and ensure codes enable appropriate options	• Develop a comprehensive housing study on diversity of housing types and trends, analyzing how they are addressed by County codes
Need more job opportunities within the County/young adults leaving County to find jobs	• Maintain Broadband Ready Status • Develop Economic Blueprint Strategy
Demand for increased retail options catering to existing residents	• Develop Economic Blueprint Strategy • Set up job skills forum with local high school, UNG and GDOL
Need for improved broadband infrastructure	• Create master plan for infrastructure improvements • Maintain Broadband Ready status
Opportunity to improve communication with the public	• Adopt a Communications Policy, with assistance from ACCG • Update long-term facility & vehicle reporting • Update financial reporting performance measures

LIST OF ACCOMPLISHMENTS

Action	Status	Comment
Revise Land Use Code to further clarify and define uses allowed	Complete	
Revise sign ordinance to accommodate potential future businesses	Complete	
Work with Development Authority to develop marketing strategy for new businesses	In Progress	
Set up job skills forum with local high school, UNG and Dept. of Labor	In Progress	
Work with Development Authority to develop marketing and business strategy for new businesses	In Progress	
Review/revise/develop regulations which encourage & attract developers, but also provide quality development through appropriate design guidelines	Complete	
Develop marketing strategy with Development Authority for new tech businesses	In Progress	
Create local foods map for marketing local attractions in the area	In Progress	
Evaluate Senior tax exemption options	In Progress	
Develop Blackburn Park area and Yahoola Reservoir to Yahoola Creek	In Progress	
Create study to explore future park development options on property surrounding Yahoola Reservoir	Complete	
Build/Expand outdoor recreational fields, courts & gym facilities	In Progress	
Expand water/sewer lines around the Southern portion of the County	In Progress	Merged with "Implement improvement plan for water/sewer"
Create a better vehicular connection to Dahlongega from S.R. 400	In Progress	
Expand/add active adult facilities (Phase 2 Expansion to Senior Center)	Complete	
Construct new library (improve library facilities)	Complete	
Replacement of Ladder Truck	Complete	
Construct New Animal Shelter	In Progress	
Renovate Administrative Facility Space	Complete	
Develop an infrastructure improvements plan for water/sewer	In Progress	Merged with "Create Master Plan for infrastructure improvements"
Implement infrastructure improvements plan for water/sewer	In Progress	
Develop an equipment & vehicle replacement schedule	Complete	
Develop workforce skills assessment report	In progress	
Evaluate current infrastructure and its ability to service commercial & industrial clients	In progress	
Create Master Plan for infrastructure improvements	In Progress	
Complete Clerk of Court Historical Records Imaging	Complete	
Develop a long-range transportation plan	In Progress	

Lumpkin County Comprehensive Plan

2022

Construct Fueling Station	Complete	
Upgrade Senior Center equipment and vehicles	Complete	
Replace Transit Vehicles	In Progress	
Implement Digital Public Safety Communication System	Complete	
Comprehensive Plan Update	Complete

2026	Update Comprehensive Plan	\$40,000	DCA	Planning; GMRC

DRAFT

39

POLICIES & LONG-TERM OBJECTIVES

- Work with Urban Forestry Program to preserve/protect aesthetic green space along 400 corridor
- Preserve environmentally sensitive/ important lands
- Market potential brewery/ brewpub/ additional wineries in County
- Promote Eco-Tourism, Local Foods & Agri-Tourism within the County
- Work with the City of Dahlonega to preserve local history & the built environment (farm & history of mining)
- Continue to connect trail systems throughout the County
- Promote/support more tourism attractions
- Repair/Maintain/Improve Public Roads throughout the County
- Public Facility Renovations as needed
- Continue upgrading Public Safety Communication System as needed for FCC Compliance
- Work with the City of Dahlonega and citizens to preserve historic files and records
- Replace Patrol vehicles (4 per year)
- Resurface or pave 15 miles of road each year
- Upgrade and/or enhance ADA facilities throughout the County
- Upgrade/replace emergency services vehicles, gear, and facilities as needed
- Upgrade recreation facilities, equipment, & vehicles as needed
- Develop more job opportunities within the County
- Attract more grocery store/retail businesses to the County
- Promote/acquire more high-tech industries in Lumpkin County
- Support the Development Authority
- Maintain Broadband Ready status
- Support local agricultural interests
- Target utility and infrastructure improvements in ways compatible with rural character

Population Inside Urbanized Cluster	16.
Rural Population	83.

Data Note: Households with children include any households with people under age 18, related or not. Multigenerational households are families with 3 or more parent-child relationships. Unmarried partner households are usually classified as nonfamily households unless there is another member of the household related to the householder. Multigenerational and unmarried partner households are reported only to the tract level. Esri estimated block group data, which is used to estimate polygons or non-standard geography.

Data Note: Consumer spending shows the amount spent on a variety of goods and services by households that reside in the area. Expenditures are shown by broad budget categories that are not mutually exclusive. Consumer spending does not equal business revenue. Total and Average Amount Spent Per Household represent annual figures. The Spending Potential Index represents the amount spent in the area relative to a national average of 100.

Source: Consumer Spending data are derived from the 2018 and 2019 Consumer Expenditure Surveys, Bureau of Labor Statistics. Esri.

Source: U.S. Census Bureau, Census 2010 Summary File 1. Esri forecasts for 2021 and 2026 Esri converted Census 2000 data into 2010 geography.

Note: *Denotes confidential data relating to individual employers and cannot be released. These data use the North American Industrial Classification System (NAICS) categories. Average weekly wage is derived by dividing gross payroll dollars paid to all employees - both hourly and salaried - by the average number of employees who had earnings; average earnings are then divided by the number of weeks in a reporting period to obtain weekly figures. Figures in other columns may not sum accurately due to rounding. All figures are 2nd Quarter of 2021.

Source: Georgia Department of Labor. These data represent jobs that are covered by unemployment insurance laws.

Quality Community Objectives Assessment

Since 1999 the Board of the Department of Community Affairs has identified various Quality Community Objectives (QCOs) as value statements of the development patterns and options that will help Georgia preserve her unique cultural, natural and historic resources while looking to the future and developing to her fullest potential.

These ten objectives are adapted from generally accepted community development principles to fit the unique qualities of Georgia's cities and counties. Although these objectives are only recommendations, we are convinced that implementing these principles will result in greater efficiency and cost savings for local governments and a higher quality of life for their citizens.

- **Economic Prosperity:** Encourage development or expansion of businesses and industries that are suitable for the community. Factors to consider when determining suitability include job skills required; long-term sustainability; linkages to other economic activities in the region; impact on the resources of the area; or prospects for creating job opportunities that meet the needs of a diverse local workforce.
- **Resource Management:** Promote the efficient use of natural resources and identify and protect environmentally sensitive areas of the community. This may be achieved by promoting energy efficiency and renewable energy generation; encouraging green building construction and renovation; utilizing appropriate waste management techniques; fostering water conservation and reuse; or setting environmentally sensitive areas aside as green space or conservation reserves.
- **Efficient Land Use:** Maximize the use of existing infrastructure and minimize the costly conversion of undeveloped land at the periphery of the community. This may be achieved by encouraging development or redevelopment of sites closer to the traditional core of the community; designing new development to minimize the amount of land consumed; carefully planning expansion of public infrastructure; or maintaining open space in agricultural, forestry, or conservation uses.
- **Local Preparedness:** Identify and put in place the prerequisites for the type of future the community seeks to achieve. These prerequisites might include infrastructure (roads, water, sewer) to support or direct new growth; ordinances and regulations to manage growth as desired; leadership and staff capable of responding to opportunities and managing new challenges; or undertaking an all-hazards approach to disaster preparedness and response.
- **Sense of Place:** Protect and enhance the community's unique qualities. This may be achieved by maintaining the downtown as focal point of the community; fostering compact, walkable, mixed-use development; protecting and revitalizing historic areas of the community; encouraging new development that is compatible with the traditional features of the community; or protecting scenic and natural features that are important to defining the community's character.
- **Regional Cooperation:** Cooperate with neighboring jurisdictions to address shared needs. This may be achieved by actively participating in regional organizations; identifying joint projects that will result in greater efficiency and less cost to the taxpayer; or developing collaborative solutions for regional issues such as protection of shared natural resources, development of the transportation network, or creation of a tourism plan.

- **Housing Options:** Promote an adequate range of safe, affordable, inclusive, and resource efficient housing in the community. This may be achieved by encouraging development of a variety of housing types, sizes, costs, and densities in each neighborhood; instituting programs to provide housing for residents of all socio-economic backgrounds; or coordinating with local economic development programs to ensure availability of adequate workforce housing in the community.
- **Transportation Options:** Address the transportation needs, challenges and opportunities of all community residents. This may be achieved by fostering alternatives to transportation by automobile, including walking, cycling, and transit; employing traffic calming measures throughout the community; requiring adequate connectivity between adjoining developments; or coordinating transportation and land use decision-making within the community.
- **Educational Opportunities:** Make educational and training opportunities readily available to enable all community residents to improve their job skills, adapt to technological advances, or pursue life ambitions. This can be achieved by expanding and improving local educational institutions or programs; providing access to other institutions in the region; or coordinating with local economic development programs to ensure an adequately trained and skilled workforce.
- **Community Health:** Ensure that all community residents, regardless of age, ability, or income, have access to critical goods and services, safe and clean neighborhoods, and good work opportunities. This may be achieved by providing services to support the basic needs of disadvantaged residents; instituting programs to foster better health and fitness; or providing all residents the opportunity to improve their circumstances in life and to fully participate in the community.

SWOC Assessment – GMRC Digital Economy Plan

	Strengths	Weaknesses	Opportunities	Challenges
Workforce/ Education	Higher Educational Institutions – University of North Georgia, Brenau, North Georgia Technical School, Lanier Technical School,	Limited existing hi-tech labor force	Economic and demographic growth of metro Atlanta	Attraction/ Retention of top technology talent
	Faster Business Start-up Time	Low family income	Job fairs held within the region by GMRC Workforce Development	Competition from other metro areas
	Dawson GigCenter – Business start-ups			
	GMRC Workforce Development			
	Strong Dev. Authorities and Chamber offices to assist start-up businesses and industries			
Infrastructure	Cooperative EMC's that deliver good products	System Redundancy. Residents and Businesses need more choices for internet service.	Tourism/outdoor recreation related industry	Topographically the GMRC Region is difficult to traverse for aerial line installation
	North Georgia Network	Cost prohibitive		
	Access to metro Atlanta	Geographic isolation		
	Ga 400 – Technology Corridor			
	Residents ability to telecommute			
Local Government	GMRC fostering cooperation	Limited funding resources	Educating local government on importance of broadband access	Finding Grant funds for broadband projects
	Quality Development Authorities and Joint Development Authorities	State needs to put more emphasis on education		Need to better communicate to State Legislators the Region's needs regarding broadband initiatives & projects
	Goal: <i>Ensure new telecommunication networks for needed accessibility and reliability to support the growth of the regional economy.</i> Strategy: <i>Prepare to meet industry and business telecommunication needs by assisting with fiber optic network development.</i> The purpose of this strategy is to support, develop, and provide educational opportunities regarding telecommunication systems in the region. Strategy: <i>Promote and support the use of health information technology (IT).</i> The purpose of this strategy is to encourage local partnerships between health providers and local leaders in using telecommunications and other information technology to improve care to patients and lower health costs.

LUMPKIN COUNTY RESOLUTION NO. 2022-09

**A RESOLUTION TO APPOINT MEMBERS TO THE
HOSPITAL AUTHORITY OF LUMPKIN COUNTY**

Whereas, the Board of Commissioners of Lumpkin County desires to reappoint two members to the Hospital Authority of Lumpkin County whose terms will expire on March 1, 2022;

Now therefore, it is hereby resolved that the following persons are appointed to the Hospital Authority of Lumpkin County for the positions and terms as follows:

<u>Name</u>	<u>Seat</u>	<u>Term Expiration</u>
Leland Cox	5	March 1, 2026
Larry Charles	6	March 1, 2026

Resolved, adopted and effective this 15th day of February, 2022.

Chris Dockery, Chairman
Lumpkin County Board of Commissioners

Public Works Department

Date: February 1, 2022

Agenda Item: Road Acceptance Camp Creek Overlook

Item Description: Road Acceptance Camp Creek Overlook. Greg Hayes has requested that the road in Camp Dr. be accepted into the County Maintenance System.

Facts & Historical Information:

On February 12, 2019 the Lumpkin County Planning Commission gave final plat approval for Camp Creek Overlook Subdivision. The current ordinance states “*After the final plat has been approved by the planning commission, a resolution to accept the roads into the county road system will be prepared by the county attorney and placed on the agenda for the next board of commissioners meeting for road acceptance*”. The Developer requested that, instead of final topping the road before final subdivision approval, he be allowed deposit the total amount of final topping into an escrow account set up by the county to be refunded to him at the time final topping was installed, inspected and approved. The road was final topped in August of 2021. It was inspected and approved by county staff and is now ready to go before the BOC for acceptance into the County Maintenance System. Camp Drive is a one-way road with 12’ pavement width.

Road information:

Road Name: Camp Drive
 Length: 0.187 Miles
 Right of way width: 30 ft min.
 Area of right of way: 0.69 ac.

Attachments:

- Plat of subdivision

Staff Recommendation:

Lumpkin County Staff recommends that the roads be accepted into the county system.

LUMPKIN COUNTY RESOLUTION NO. 2022 -10

**A RESOLUTION TO ADOPT THE ROAD
WITHIN
CAMP CREEK OVERLOOK SUBDIVISION**

Whereas, the Lumpkin County Planning Director has recommended to the Lumpkin County Board of Commissioners that the road within Camp Creek Overlook Subdivision be accepted and adopted as a county road; and

Whereas, the Lumpkin County Planning Director has found that the road has been developed in accordance with the plans approved by the planning office; the condition of the road has been found acceptable to the public works department and the certificate of title has been found acceptable to the county attorney; and

Whereas, the Lumpkin County Board of Commissioners now desires to adopt the road within Camp Creek Overlook Subdivision as a county road;

Now therefore, it is hereby resolved that the following road is accepted and adopted as a Lumpkin County road:

<u>Road Name</u>	<u>Right of Way Width</u>	<u>Length of Road</u>
Camp Drive	variable	0.187 miles

The road is more particularly set out on that Final Plat for Camp Creek Overlook prepared by Dusty L. Lowman, Georgia Registered Land Surveyor, which plat is recorded in Plat Book 2019, Page 53, Lumpkin County Records.

Resolved, adopted and effective this 15th day of February, 2022.

Agenda Item:	2022 LMIG Road Resurfacing Bid Award
Item Description:	2022 LMIG Road Resurfacing Bid Award. Recommendation to award the LMIG (Local Maintenance and Improvement Grant) project bids.
Facts & Historical Information:	On January 25, 2022 Lumpkin County received bids for the resurfacing of 7.00 miles of county roads under the LMIG program. Five bidders submitted bids on the project. The low bidder was Colditz Trucking with a price of \$829,426.50. This amount is \$49K below the estimated cost of \$879,120. GDOT has awarded Lumpkin County \$589,172.22 in funds for the 2022 LMIG. The minimum amount of the project cost will have to be \$765,923.89 based on 130% of the LMIG funds. The remaining amount of the contract will be paid from TSPLOST funds. The bid amount will be in excess of minimum funds required to get full LMIG program funding. See attached bid tab and road list.
Potential Courses Of Action:	A) Award contract to Colditz Trucking in the amount of the bid. B) Do not award contract.
Staff Recommendation:	Staff recommendation COA A): Award contract to Colditz Trucking in the amount of the bid.
